

Declaration against animal testing

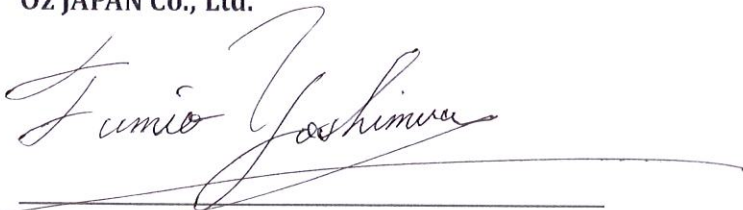

We, Oz JAPAN Ltd, make clear our opposition to the use of animal testing in the development of cosmetics and food products. We actively employ non-animal testing methods to guarantee the safety and effectiveness of our products and contribute to the improvement of animal welfare. In addition, we deeply understand the seriousness of protecting animal life and maintain a respectful attitude towards all life.

Animal testing has long been used as a means of assessing product safety. However, advances in science and technology have already led to the development of safety assessment methods that do not involve the use of animals. These methods are an effective and humane alternative to animal testing. We firmly believe that we have a responsibility to respect the life and welfare of animals and to reduce the suffering and anxiety they face.

1. We actively adopt the latest non-animal testing techniques in our product development and safety assessments.
2. We invest in research to develop and improve non-animal testing methods and increase the effectiveness of these methods.
3. We will strive for transparency of information on product safety assessments so that consumers can make informed choices.
4. We comply with all legal requirements relating to animal testing and act within the legally permitted scope of adopting non-animal testing methods.

We, Oz JAPAN Ltd, will uphold our position against animal testing and continuously strive to improve animal welfare and ensure consumer safety. And we declare that we will always bear in mind the seriousness of protecting animal life and act with respect for all life for a sustainable future.
